ABOUT ME

Full Stack Developer, with experience working with JavaScript, NodeJS, React, Express, MongoDB, REST API creation, GraphQL for queries, among others. I participated in the creation of a freelance App for the data organization of a Poker company in which we saved the client 40% of time for both data loading and data visualization. I am passionate about programming and its environment, working in a team seems to me an excellent opportunity to learn and teach.

TECHNOLOGIES

React, Express, HTML, Next, CSS, Material UI, JavaScript, Chakra UI,Tailwind, Redux, Stripe, Node, Firebase, PostgreSQL, Sequelize, SQL, MongoDB, API Rest, GraphQL, Scrum Methodology.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Poker Data   Oct. 22 - Dec. 22.
Freelance, Rosario, Argentina.

- Design and develop an App for data organization: searching, filtering, sorting, user creation, player creation, data organization in tables, API consumption, own database, API Rest creation, own user authentication.
- Technologies used: for the front end we used React, Redux, Material UI and CSS, for the back end Node.js, Express and the database in Mongo.
- We work with Scrum methodology.
- GitHub – (GitHub)

Full Stack Teaching Assistant.   Aug. 22 - Nov.22.
Henry Bootcamp, Buenos Aires, Argentina.

- Coordinate a group of students to achieve integration into the study team.
- Assist in the resolution of exercises and promote group collaboration (Pair Programming).
- Propose ideas for the improvement of the Bootcamp's processes.

Full Stack Developer – Casual
Personal Project

- Design and develop an apparel ecommerce with search, filtering, payment gateway, user registration and login, data persistence through Cookies, API Rest creation.
- Technologies used: on the front-end Tailwind, CSS and Next, for the back-end Node, Express, as database Mongo, for data persistence Cookies and for user authorization NextAuth.
- Video and GitHub – (Video, GitHub)

Front End Developer – Uber Clone
Personal Project

- Design and develop an Uber clone Front End: used React Native for navigation, Google APIs for Map rendering, location points, distance between points, Tailwind and CSS for styles.
- Technologies used: React Native, Tailwind CSS.
- Video and GitHub – ([Video](#), [GitHub](#))

Full Stack Developer – Kinema
Personal Project
- Design and develop a movie and series streaming App: search, filtering, sorting, user creation and management, payment gateway, subscriptions, image upload, video playback, own and Google authentication, API Rest creation.
- Technologies used: For the front end we used React, Redux, Chakra UI and CSS, for the back end we used Node, Express and the database in MongoDB. We also use Firebase to store and authenticate users, Stripe as payment gateway, Cloudinary to store images, Email.js for email notifications and Alert.io for in-app notifications.
- We work with Scrum methodology.
- Video and GitHub – ([Video](#), [GitHub](#))

Full Stack Developer – Recipes App
Personal Project

- Design and develop a recipe App with: searching, filtering, sorting, API consumption, own database, creation of API Rest.
- Technologies used: For the front end I used React, Redux, HTML, CSS, for the back end I used Node, Express and the database with PostgreSQL.
- Video and GitHub – ([Video](#), [GitHub](#))
